

"From Youth to Elderly: Understanding Age and Employment in Southeast Asia"

INTRODUCTION

The project intends to investigate the connection between employment and age in Southeast Asia, with an emphasis on understanding the opportunities and constraints experienced by people in various age groups. The study will offer important insights into the employment patterns and trends in the area by evaluating and interpreting data on workforce dynamics.

SUSTAINABLE DEVELOPMENT GOALS 8

Economic growth should be a positive force for the whole planet. This is why we must make sure that financial progress creates decent and fulfilling jobs while not harming the environment. We must protect labour rights and once and for all put a stop to modern slavery and child labour. If we promote job creation with expanded access to banking and financial services, we can make sure that everybody gets the benefits of entrepreneurship and innovation.

8 DECENT WORK AND ECONOMIC GROWTH

PROBLEM

Despite the increasing focus on inclusive employment policies, Southeast Asia still has a long way to go before it can guarantee opportunities for people in all age groups. It is necessary to have a greater grasp of the connection between age and work because of the region's various demographics and changing labour market characteristics. Age-inclusive practices cannot be developed due to insufficient research and ineffective policy initiatives, which has an adverse effect on job outcomes and the potential of people of all ages. Investigating the obstacles, chances, and solutions that can improve age-inclusive employment in Southeast Asia is therefore urgently needed. Stakeholders can work toward establishing an inclusive workforce that honors and makes use of the abilities and experiences of people from young to old by addressing these gaps.

SIGNIFICANCE OF THE STUDY

The Students

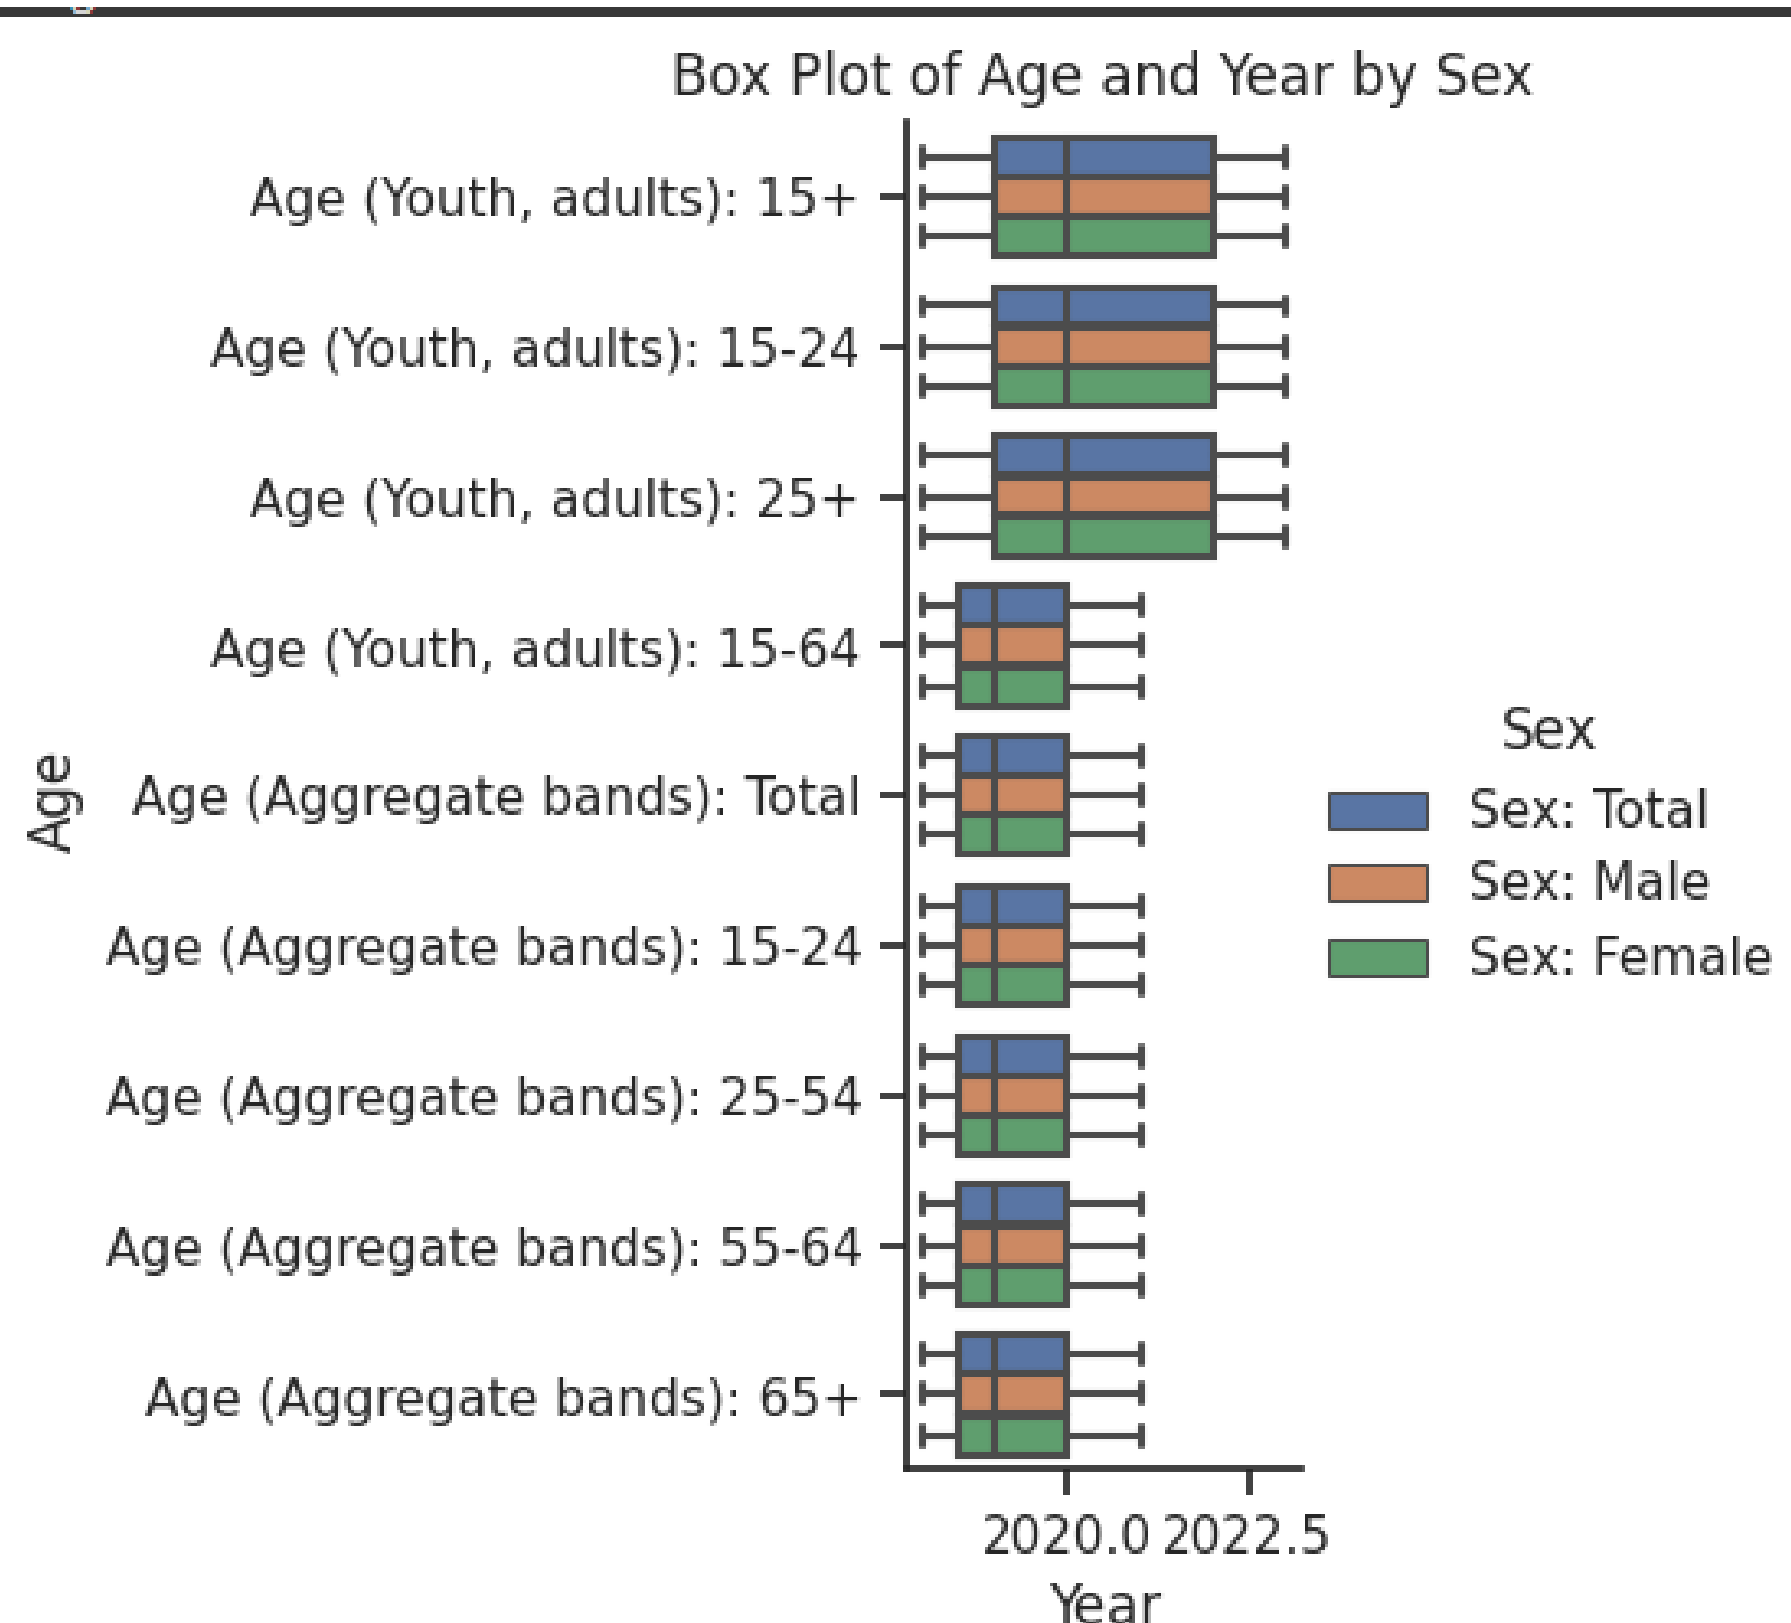

The Future Researchers

The Teachers

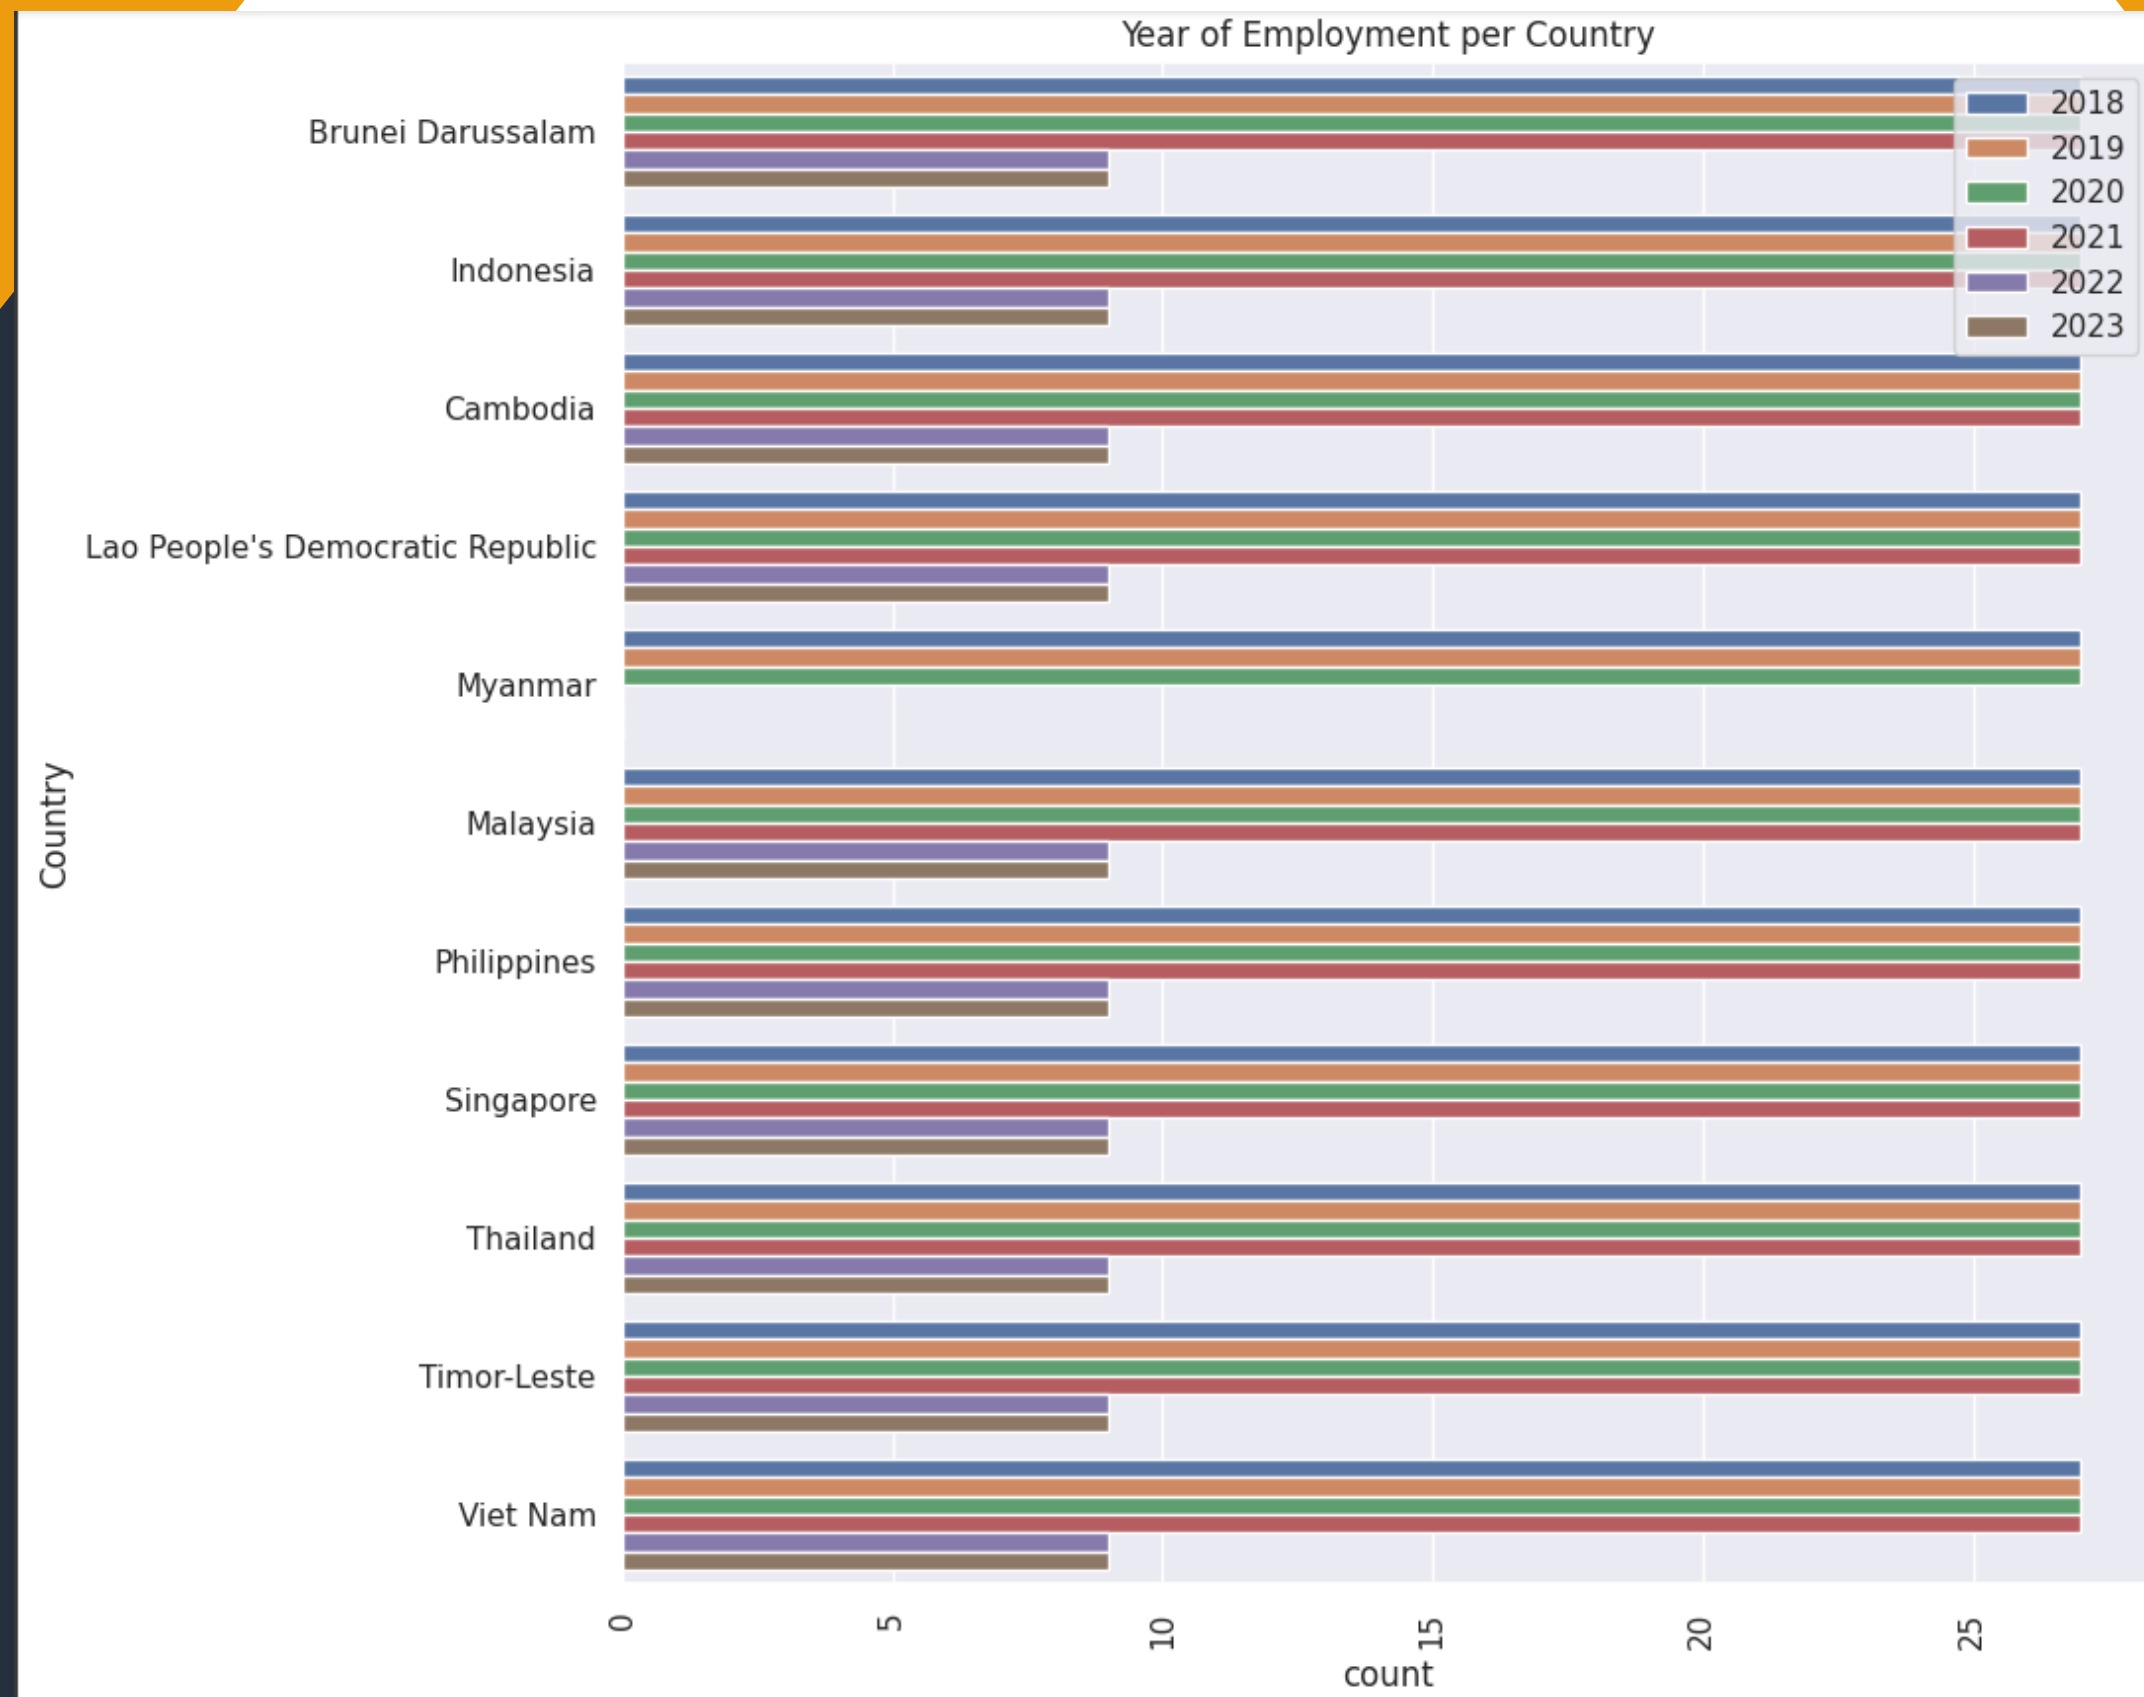

**The Government
Officials**

Employment By Age and gender employed per Year

Yearly Employment Rate per Country

Yearly Employment Rate per Country

Distribution the Gender employed per Country

Distribution of Age within each Country
